Education

Pathways School Gurgaon

Subjects: CS(SL), Math AI(HL), ITGS(HL), Business(HL), English (SL), Spanish (SL)

Gurugram, India.

May 2013 – May 2023

Wilfrid Laurier University

Bachelor of Science in Computer Science, Co-op Program

Waterloo, ON, Canada.

Sept 2023 – Present

EMPLOYMENT SKILLS

Languages: Python, Java, JavaScript, HTML, CSS

Developer Tools: Git, Jupyter Notebook, Google Colab VS Code, PyCharm, Eclipse

Libraries and Frameworks: React.js, Node.js, Pandas, NumPy, PyTorch, OpenCV, NLP-NER Models, Rapidfuzz, FuzzyWuzzy

Other Skills: Project Planning, Research Skills, Business Strategy, Teamwork, Time Management, Self-Management, Analytical Thinking, Communication, Problem Solving.

Experience

Data Science and Analytics Team

20th May. 2024 – 19th Aug 2024

Hindustan Times Media Group

Gurgaon, India

- Developed and optimized an intelligent resume sorting system for Shine using Natural Language Processing (NLP) techniques, enhancing candidate matching efficiency.
- Trained Named Entity Recognition (NER) models to accurately categorize attributes from large resume datasets, improving filtering accuracy for specific job requirements.
- Utilized regular expressions (regex) and fuzzy matching algorithms to refine matching processes, resulting in faster and more accurate candidate recommendations.

Software Development Team

27th June-8th July 2022

Charles Hudson Technology Solutions

Bengaluru, India

- Initiated and worked on front end code and some API's that update the Database when clients perform front end actions.
- Worked with a new software MongoDB and used Java, Python to understand professional software development.
- Gained experience contributing to the testing software and working extensively in a team.

Projects

Real Estate Management Application | Java, MAMP Database

Jan - Feb 2023

- Developed a Java real estate management system, focusing on object-oriented architecture to provide maintainability and scalability.
- MAMP was used to integrate the MySQL database, and tables with main and secondary keys were defined for data organization.
- Used SQL queries for effective operations, indexing and normalizing data to maximize performance.

Automated Trained Model using NLP/NER | Python, NLP, NER, Regex, Anaconda,

March - April 2023

- Developed an intelligent resume sorting system for Shine using advanced Natural Language Processing (NLP) and trained Named Entity Recognition (NER) models to identify key attributes in resumes.
- Utilized regular expressions (regex) and fuzzy matching algorithms for precise job requirement matching, enhancing the model's accuracy with unstructured data.
- Gained experience in NLP model development and data sorting algorithms, applying AI-driven solutions to real-world recruitment challenges.

Volunteer Experience

- Organized a Digital Safety Workshop for low-income communities (Aug 2022)
- Member of Wilfrid Laurier Clubs:** Healthy Lifestyle, Halk Walk Committee and Laurier Google Developers Group
- Crowdfunded INR 23,100** for the Akshaypatra Foundation (2019)
- Club Member of the robotics club

Awards and Certifications

- Recognized for significant contributions to resume sorting project at Hindustan Times.
- Featured in IJARIT Journal database** for AI/ML research in agriculture.
- Acknowledged for front-end development work** at Charles Hudson Technology Solutions.
- First Year Leadership Program Certificate (2023)
